

For Immediate Release

Rocket Division Software [info@rocketdivision.com]

FREE CD/DVD/BLU-RAY BURNING, GRABBING AND MASTERING TOOL STARBURN VERSION 10 HAS BEEN RELEASED.

Rocket Division Software had announced availability of version 10 of its burning, grabbing and mastering application STARBURN.

Accordingly to Anton Kolomyeytsev (CEO of the company) main goal of this software is to promote the StarBurn SDK - developers targeting toolkit that enables developers to perform the complete range of manipulations with optical media storage including discs in Blu-Ray and HD-DVD formats. "We didn't really try to sell software for end-users on CD/DVD/Blu-Ray burning software market. We're well known as the creators of the StarBurn CD/DVD burning and mastering SDK and StarBurn is only some sort of demonstration what can be done with our technologies. Just a tiny subset of the functions SDK exports to the end-users. Better say - programmers. But we're glad the community can benefit from such a powerful tool being distributed as freeware." Mr. Kolomyeytsev said. He did mention that there is a commercial version of product available which enables networking operations but again sales is not the main focus here. "It does work for our good name already and that's more than enough for now." he added.

About StarBurn: StarBurn (100% based on StarBurn SDK) is a powerful tool for grabbing, burning and mastering CD, DVD, Blu-Ray and HD-DVD media. StarBurn supports all types of optical storage media (including CD-R/RW, DVD-R/RW, DVD+R/RW, BD-R/RE, HD-DVD-R/RW and DVD-RAM) as well as a wide variety of burning hardware. More detailed information, free download and complete features list are available at the <http://www.rocketdivision.com/starburn.html>.

About StarBurn SDK. This software development kit allows you to add optical media recording and mastering capabilities to your application in minutes. When purchased, SDK comes as a static or dynamic library, set of headers, documentation and samples. The detailed information about the product and its features can be checked out at the http://www.rocketdivision.com/burn_sdk.html

About Rocket Division Software: Rocket Division Software is rapidly growing company providing cutting-edge system-software solutions for Windows NT/2000/XP/2003 and various UNIXes. We're positioning as a provider of the top-notch, high-performance technologies for the data storage and networking industry. Our "know how" and development services cover a wide range of existing and emerging storage and networking technologies, such as: CD/DVD recording and mastering, iSCSI virtual storage, local and network file system design. Rocket Division Software can be found at <http://www.rocketdivision.com>.
