

For Immediate Release

Rocket Division Software [info@rocketdivision.com]

MAJOR UPDATE OF THE STARWIND iSCSI TARGET IS AVAILABLE FOR DOWNLOAD.

Rocket Division Software has announced the availability of the new major update for company's leading iSCSI solution StarWind (iSCSI target) New version 2.6.x introduces number of serious updates and additions to the product.

- Brand-new web GUI fully repeats functionality of the Windows GUI and enables remote administration of the service using any Web browser.
- New plug-in IBVolume offers the incremental backup functionality with the rollback and dynamic disc space allocation features.
- ImageFile, IBVolume and RamDisk plug-ins successfully passed tests with Microsoft iSCSI Target HCT 5.1
- Implemented remote images browsing facility.

"These improvements together with the number of fixes make this update a must for current users and open new market niches for our product" says company's CEO Anton Kolomyeytsev

StarWind is an iSCSI target (server-side) product. This software combined with StarPort iSCSI initiator (or any iSCSI initiator iSCSI 1.0 compatible) running on client allows you to export any local CD and DVD burners to the network users (all CD and DVD recording applications running on a client side are supported), export local tape drives for backup and restore on client machine (all of the backup software tools running on a client machine are supported), virtual hard disk drives over the network, export whole server storage subsystem over the network at the block level, work with the dynamic volume snapshots, incremental backups and virtual tapes etc. Create RAM disk drives for temporary data storing (Solid-State-Disk emulation). Export standard CDI, ISO and MDS images as network virtual CD and DVD drives. More information can be found at <http://www.rocketdivision.com/wind.html>

About Rocket Division Software: Rocket Division Software is rapidly growing company providing cutting-edge system-software solutions for Windows NT/2000/XP/2003 and various UNIXes. We're positioning as a provider of the top-notch, high-performance technologies for the data storage and networking industry. Our "know how" and development services cover a wide range of existing and emerging storage and networking technologies, such as: CD/DVD recording and mastering, iSCSI virtual storage, local and network file system design. Rocket Division Software can be contacted at <http://www.rocketdivision.com/>
